About Me

Experienced Laravel developer with 3 years of industry experience. Dedicated to delivering high-quality web solutions and continuously improving development processes. Seeking opportunities to contribute my expertise to innovative projects and collaborate with motivated teams.

Work Experience

Code Clouders

Mansoura, Egypt

Full Stack Developer

May 2023 - Present

- Responsible for developing the backend/frontend for the code clouders projects.
- An official for new trainees in the company and help them develop themselves in the Technologies.
- I have worked on problems in the company that has no product for the gain, and I the owner to implement the idea. More details
- I was a contributor to the development of ITI's new graduate students to develop their skills in the best solutions to problems and take into account the principles and basics of programming.

Freelancer

From home

Full Stack Developer

May 2023 - Present

- I worked as a freelancer by recommending fairly average projects to my friends, in teams, sometimes being the sole developer of projects.

DUBISIGN

Giza, Egypt

Backend Developer

Mar 2022 - Des 2023

- Responsible for developing the backend/frontend for the DUBISIGN projects.
- An official for new trainees in the company and help them develop themselves in the Technologies.
- I have worked on problems in the company that has no product for the gain, and I the owner to implement the idea. More details

IT-Misir

Giza, Egypt

FullStack Developer

May 2021 - Feb 2022

- IT Misr is a company that works in various fields via the Internet, such as photography, digital marketing, advertising, and others.
- I worked in the company as a full stack to work on relatively small and medium projects related to pharmacies, stores and analytics sites.
- I have worked on problems in the company that has no product for the gain, and I the owner to implement the idea. More details
- I worked at it-misir as a junior developer and it was my first company I had difficulty because I was the only one in my field as a full stack developer.
- I faced the most difficult challenges in this company because the company did not specialize in software engineering and I was the first developer to join this company as a developer
- But I completed this challenge perfectly. I was not ready to handle being the full stack. I was supposed to work as a frontend only, but it required self-development and learning the backend using the Laravel framework to complete the challenge.

Projects

Supply chain system

PHP, Laravel, MySql

Feb 2022 - Apr 2022

- As a backend developer, I contributed with my team in developing the backend of the logistics management application website until it went up to production.
- I've been influential in this project adding solutions to performance problems and design patterns for this project.
- A messaging system to make consumers and suppliers more accurate and communicate with each other

School system

May 2024 - Apr 2022

<https://drughub.com>

- The idea of the system is to make it possible for the father to request his son from the school, and when the son requests, the system outputs a voice to call him by the student's name to go to the father.

Saveto

Saveto app

Nov 2021 - Dec 2021

- As a backend developer, I was responsible for building the API for the mobile application to build the application of leading companies in the field of manufacturing building and finishing materials.
- I integrated another system to make Saveto more familiar with all users.

Gatekeeper

PHP, Laravel, MySql

- This package provides a comprehensive system for managing roles and permissions in Laravel applications.
- It allows for easy creation and management of roles, assigning permissions to specific roles, and controlling access to different parts of the application based on a user's assigned roles and permissions.

Hospital Backend APIs

<https://github.com/kettasoft/ondemium>

- Ondemiom is a management system for hospitals, doctors, and patients that provides integrated services in the world of medicine and is very similar to Vezeeta..
